

# Mask filter cutting guideline

Tilley

Follow the measurements below when cutting your filter to fit in your face mask.

## Instructions:

- 1 Fold your filter fabric in half, place pattern on filter using the fold line, this way you will have 2 sides
- 2 You can use more than one sheet of filter if you desire, this will make your mask fill stiffer.
- 3 When inserting your filter, insert through the pocket opening and feed through
- 4 Once the filter is fully in, flatten it out to reach all edges of the mask.
